**DETAILED ACTION**

***Response to Arguments***

1. The 35 U.S.C. §112 rejection has been vacated based on the amendment submitted on 11/28/07.
2. Applicant's argument in light of the amendment with respect to the prior art rejection have been fully considered and are persuasive. The prior art rejection of claims 1-16 have been withdrawn.

***Drawings***

3. Figure 1 should be designated by a legend such as --Related Art-- because only that which is old is illustrated. Applicant argues specification discloses the features of the invention in the figure. However this is not the case since the descriptors being transferred from USB device to host is what is novel, and this is not shown in Fig. 1. Fig. 1 simply shows a typical host to USB device set up, nowhere are there descriptors. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Allowable Subject Matter***

4. Claims 1-16 and 19-24 are allowed.

The following is the statement of reasons for the indication of allowable subject matter: The prior art disclosed by the applicant and cited by the Examiner fail to teach or suggest, alone or in combination, ***all*** the limitations of the independent claim(s) (*claims 1, 8, 16 and 22*), particularly a device attached to a host where a predetermined data structure is transferred from the device to the host to indicate whether or not the device supports DMA.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patents and patent related publications are cited in the Notice of References Cited (Form PTO-892) attached to this action to further show the state of the art with respect to indicating whether DMA is enabled or disabled.

- US Pat. Pub. 2004/0103234 to Zer et al. discloses a peripheral card device that attaches to a host device and the card will have an indication of whether DMA transfer is supported or not (*Paragraph 47*). However, Zer et al. was filed after the foreign priority date of the instant application.
- US Pat. No. 6,898,678 to Six et al. discloses a control register that indicates whether DMA is enabled or disabled (*col. 8 l. 44-50*). However, Six et al. does not disclose the register being on the peripheral device nor that it is in descriptor form for transfer from the USB device to host device.

### ***Conclusion***
